

## “Scattered Abroad” *Cro-Magnons and Neanderthals*

### ***Quotes are from anthropologists, archeologists, ethnologists, and sociologists***

No clear traces of the men and cultures of the Stone Age have been discovered in the central highland of Asia.

H. J. Fleure, *The Races of Mankind*, p.45

It is a remarkable fact that so far all the fossil men have been found in the marginal regions that are most unlikely to have formed the cradle of the human race. No remains are known to us from Asia where most scholars who have occupied themselves with the origin of man would place the earliest races.     Wilhelm Koppers, *Primitive Man and His World Picture*, New York, 1936, p.239.

A series of zones is shown to exist which is so arranged that the most primitive are found farthest from Asia, and the most advanced nearest to Asia. Whichever region we consider, Africa, Europe, Australia, or America, we find that the major migrations have always been from Asia.

Griffith Taylor, *Environment, Race and Migration*, University of Toronto, 1945, p.9, 10.

“Melanesians, Negroes, and American Indians”     Griffith Taylor, *Environment, Race and Migration*, University of Toronto Press, 1945, p.11.

How can one explain the close resemblance between such far distant types as are here set forth? Only the spreading of racial zones from a common cradle land can possibly explain these biological affinities.     Griffith Taylor, *Environment, Race and Migration*, University of Toronto, 1945, p.67

The most primitive groups are found in the regions most distant from Asia, in the most inaccessible of regions. Given these conditions it seems logical to assume that the racial zones can only have resulted from similar peoples spreading out like waves from a common origin. All indications point to a region of maximum evolution not far from Turkestan. It is not unlikely that the time factor was similar in the spread of all these peoples.     Griffith Taylor, *Environment, Race and Migration*, University of Toronto, 1945, p.121

All the visible footsteps lead away from Asia. They are among the Negroes in the Congo Forest, and they turn up on the eastern fringe of Asia, in the Philippines, and in New Guinea, and perhaps Australia with probable traces in Borneo, Celebes, and various Melanesian Islands. . . . . The Negritos must have had a migration from a common point. . . . . And it is hopeless to assume that their point of origin was at either end of their range. It is much more likely that they came from some point midway which is in Asia.     William Howells, *Mankind So Far*, 1945, pp.298.

They are almost certainly examples of a type which has been pushed out to the margins.     Linton, Ralph, *The Study of Man*, 1936, p.26

They are the "wreckage" of more highly developed societies forced through various circumstances to lead a much simpler, less-developed life.  
Science Yearbook, 1966

**Genesis 1:26** Then God said, "Let Us make man in Our image, according to Our likeness"

**Genesis 8:4** In the seventh month, on the seventeenth day of the month, the ark rested upon the mountains of Ararat.

**Genesis 9:18-19** Now the sons of Noah who came out of the ark were Shem and Ham and Japheth. These three were the sons of Noah, and from these the whole earth was populated.

**26** He said, "Blessed be the LORD, The God of Shem;

~~And let Canaan be his servant—~~ And let **Ham** be his **(personal) designer**

**27** "May God (**gradually**) enlarge Japheth,

And let him dwell in the tents of Shem;

~~And let Canaan be his servant—~~ And let **Ham** be his **(personal) designer**

**Genesis 10:6** The sons of Ham were Cush and Mizraim and Put and Canaan.

**7** The sons of Cush were Seba and Havilah and Sabtah and Raamah and Sabteca; and the sons of Raamah were Sheba and Dedan.

**Genesis 10:8** Now Cush became the father of Nimrod

**10** The beginning of his kingdom was Babel and Erech and Accad and Calneh, in the land of Shinar.

**Genesis 11:2** It came about as they journeyed east, that they found a plain in the land of Shinar and settled there.

**4** They said, "Come, let us build for ourselves a city, and a tower ~~whose top will reach into heaven—~~ **a tower whose top is the heavens,** and let us make for ourselves a name, otherwise we will be scattered abroad over the face of the whole earth."

**8** So the LORD ~~scattered—~~ **flung** them **rapidly** abroad from there over the face of the whole earth; and they stopped building the city.

## Quotes continued:

"Evolution, a foundational principle of modern biology, is supported by overwhelming scientific evidence and is accepted by the vast majority of scientists. Because it is fundamental to the understanding of modern biology, the faculty in the Biology Department at Baylor University, Waco, TX, teach evolution throughout the biology curriculum. We are a science department, so we do not teach alternative hypotheses or philosophically deduced theories that cannot be tested rigorously." <http://www.baylor.edu/biology/index.php?id=77368>

“Biologists would dearly like to know how modern apes, modern humans and the various ancestral hominids have evolved from a common ancestor. Unfortunately, the fossil record is somewhat incomplete as far as the hominids are concerned, and it is all but blank for the apes. The best we can hope for is that more fossils will be found over the next few years which will fill the present gaps in the evidence. If you brought in a scientist from another discipline and showed him the meagre evidence we’ve got he’d surely say, ‘forget it: there isn’t enough to go on.’” Richard E. Leakey, *The Making of Mankind*, Michael Joseph Limited, London, 1981, p. 43

**Psalm 119:98** Your ~~commandments~~ **decrees** make me wiser than my enemies, For they are ever mine.

**99** I have more insight than all my teachers, for Your testimonies are my meditation {literary, “what I hum”}.
